Evergreens

FOR HOME PLANTINGS

Low Growing, Medium and Tall

MUGHO PINE

Valuable for all low group plantings. Dwarf in habit, forming a low dome-shaped mound. Color a dark green except in early spring when the tender new growth of light green gives it a pretty two-color effect. 8 to 12 inches, \$1.25 each.

PYRAMID ARBOR-VITAE

For foundation or group planting in all landscape work. Retains the flat foliage and lovely bright green color at all seasons. Grows compact and develops naturally into perfect pyramidal form. May be sheared for strictly formal effects. 18 to 24 inch.

\$1.50 each; 2 for \$2.75.

GLOBE ARBOR-VITAE

Grows densely compact in a dwarf, globular shape. Foliage is flat and deep green in color. Is much used for formal planting and for low, evergreen hedges as they lend themselves admirably to shearing. May also be grown in tubs for use at formal entrances. 10 to 12 inch.

\$1.50 each; 2 for \$2.75.

SPREADING YEW

The spreading variety throws out sweeping branches similar to Pfitzer Juniper. May be kept trimmed back to desired size or to fit allotted space. Foliage is a shade of deep green, soft to the touch and always fresh looking. May be kept sheared for a low hedge, allowed to grow in graceful wand-like branches for informal corner plantings or trimmed into compact shape for formal effects. After the plant is several years old numerous red berries are borne close to the branches, remaining into the winter. Well rooted, 12 to 15 inch.. \$2.25

\$2.50 each; 2 for \$4.50.

UPRIGHT YEW

General foliage characteristics same as the spreading variety described above, but grows in columnar, erect form. By keeping the plant lightly sheared as it grows, the foliage will be extremely dense and compact from the ground up. Valuable for corner plantings and accent pieces. Does well in shade and seems to be very little affected by disease or pests. 15 to 18 inches, \$2.50 each; 2 for \$4.50.

HEMLOCK

Another splendid evergreen which does well in partially shaded spots is the Hemlock. It is one of the most graceful growing plants. Foliage is a light fresh green which always looks well in any planting. Will grow to quite large size if left untrimmed; however, the plants should be kept lightly sheared as they develop, thus they will become much more beautiful and foliage will be dense and compact. When the desired height is reached the trees may be kept there by trimming back each year. We have a nice block of them in 12 to 18 inch size at \$2.50 each; 2 for \$4.50.

JUNIPER EXCELSA STRICTA

(Spiny Greek Juniper)

For a semi-dwarf pyramidal Evergreen, Juniper Stricta cannot be surpassed. Foliage is a silvery blue, very compact and cedar-like. Reaches about 4 feet at maturity in our section of the country. Will get slightly larger in the South and not quite as large in northern sections. Excellent to use where height is a factor in planning a planting. We offer nice plants in 12- to 15-inch size at \$1.50 each; 2 for \$2.75.

PRIVET HEDGE

PLANTING AND GROWING HEDGES

Beautiful hedges are easily grown if a few simple instructions are observed. Dig a trench 10 to 12 inches deep and the width of a spade. Set the plants a couple of inches deeper than they stood in the nursery. This insures a dense hedge at the base. Privet should be set 10 inches apart, Barberry about 18 inches. Shrubs such as Spirea 18 inches, Chinese Elm 2 feet, and Evergreens 2 to 3 feet. Spacing may be varied depending upon the density desired. After spacing plants, fill in about one-half of the depth of the trench, then flood with water. After settling fill in balance of the trench and tramp firmly. Leave a slight depression along each side of the hedge to retain water. Keep thoroughly soaked until well started. Privet should be cut back to about 8 to 10 inches after planting to promote vigorous growth. Hedges planted in this manner rarely fail to grow.

**Do Not Allow
Your Phlox to
Go to Seed**

Keep blooms cut as they fade. If you permit plants to go to seed they will drop hundreds of seeds right around the base of the plant. Next year masses of seedlings will spring up. These usually have the old magenta color and soon kill out your true variety. This soon makes the bed a mass of seedlings.

ORIENTAL POPPIES

FOR BRIGHTEST COLOR

Oriental Poppies provide some of the most brilliant spring color for the perennial bed. Fall is the time to transplant these poppies; we are offering this fall a selection of three of the best and easiest grown varieties we know of. These are two year transplanted roots and they will bloom for you next spring.

WE OFFER THREE EXCELLENT VARIETIES
OLYMPIA

A truly outstanding poppy, rich and colorful. Flowers are of an immense size with double rows of narrow petals around a high center. Color is a very brilliant orange-red and by planting three or six in a clump, spacing plants about 12 to 16 inches apart, a real color mass is produced.

MRS. PERRY

One of the favorite poppies. Large colorful blooms of soft Salmon pink. Very free flowering and beautiful.

SALMON GLOW

Claimed by many to be most beautiful of all Poppies. It is so large, so double and so brilliant that as the blooms develop they form into huge bright, orange-salmon balls. Unexcelled for creating spots of bright color in a corner of the perennial bed or for planting in front of shrubs in the border.

MAKE YOUR PLANTINGS PERMANENT

WEIGELA ROSEA — PINK

One of the finest of the family. Tall and vigorous growing with abundant deep pink flowers in June. Occasional blooms the balance of the summer. Will reach 7 to 8 feet in height.

Excellent shrub for use in the shrub border and also desirable for use in the foundation planting about the home. **2-year blooming size, 60c each; 3 for \$1.50.**

WEIGELA FLORIBUNDA — RED

The everblooming red Weigela Floribunda surpasses all other red-flowering shrubs. Much hardier than Eva Rathke and a better flower. Commences blooming early in spring and continues all summer long. Leaves are a rich glossy green and cover the branches densely. A necessity in every border planting. Will reach 5 feet in height. **2-yr. blooming size, 60c each; 3 for \$1.50.**

SNOW GARLAND SPIREA

SNOW GARLAND SPIREA

One of the finest of the early flowering shrubs. Blooms just as the leaves appear. Entire bush becomes a mass of tiny white flowers. Foliage is cut-leaved, lacy and very ornamental in summer. In fall, after the first frost, it flames brilliantly into shades of red, gold and bronze. Perfectly hardy and thrives under average conditions. Grows to about 4 or 5 feet tall, making it a valuable addition to the list of medium sized shrubs. **50c each; 3 for \$1.25.**

SPIREA FROEBELI Red Foliage in Spring

Large flat clusters of deep pink flowers nearly all summer make this variety especially good for nearly all plantings. Dwarf in habit and fine for inner border work. Will get about 30 inches high. **50c each; 3 for \$1.25.**

SPIREA DWARF NINEBARK

Semi-dwarf and very thick and bushy in growth, attractive light brown bark, creamy white bloom. Very good for informal hedges or low borders. Reaches 30 inches in height. **50c each; 3 for \$1.25.**

SPIREA VAN HOUTTEI

Without doubt one of the most useful and most widely used shrubs in cultivation. Blooming in April and May, the plant throws out long branches that curve and droop to the ground, weighted with a mass of pure white flowers that suggest a fountain of snow. May be used for specimens, massed, or for hedges. Will grow to 8 feet high if untrimmed. **50c each; 3 for \$1.25.**

WHITE SNOWBERRY

Diminutive rose colored flowers in June and July followed by clustered milk-white fruits which remain far into the winter. Bush is compact in form with numerous slender branches. Can be used in small groups or large masses. Due to its dwarf habit it is valuable for foregrounds in shrub plantings. Grows about 30 inches high. **2-yr. shrubs: 50c each; 3 for \$1.25.**

SNOWBERRY

FINE HARDY SHRUBS

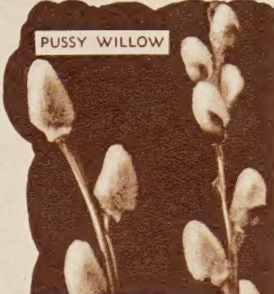

2-Yr., Field Grown, Blooming Size

BEACH PLUM

(*Prunus Maritima*)

Something really fine and new to add to your plantings! A very ornamental, rather dwarf growing tree which will enhance the appearance of your grounds and in addition will produce an abundant crop of delicious fruit. You have no doubt heard of the famous "Beach Plum" Jelly . . . Well here is the variety from which it is made. The plums are bright red blended with gold and will make some of the most sparkling jelly you ever saw. Trees begin bearing at an early age and will continue to produce heavy crops for years. We have a nice stock of these in well rooted trees and offer them at a real value giving price . . . **3 foot trees, \$1.00, each; 3 for \$2.75.**

PUSSY WILLOW

FRENCH PUSSY WILLOW

A small tree-like shrub with attractive leaves 2 inches long and an inch wide. Its popular appeal is the conspicuous silky catkins that bud in the fall and make those "springy" bouquets just as the snow melts in the spring. **2-yr., 50c ea.;**

NOTE: Larger growing shrubs should be planted about 4 feet apart for shrub borders, medium growing sorts 2 to 3 feet apart and dwarf kinds about 1 1/2 to 2 feet apart.

FIREBUSH (CYDONIA)

New, Upright Growing, Scarlet Type

Early in the spring this attractive shrub is completely covered with dazzling orange-scarlet flowers which are followed by small, fragrant, quince-shaped fruits. Foliage waxy and dark green. Branches are rough and closely knit, making it desirable for hedges.

This new type grows with branches upright instead of loosely horizontal as did the old type. **2-yr., 60 each; 3 for \$1.50.**

NOTE: This shrub cannot be sent into the States of California, Washington, Oregon, Colorado, Utah, Montana, Nevada, Arizona,

OLD-FASHIONED PURPLE LILAC

No other shrub has quite the place in the hearts of people that the old-fashioned Lilac has. Grows anywhere and its masses of light purple bloom in early spring are a constant delight. Fine for tall hedges, screens or specimens. No grounds are complete without this fine old shrub. Grows to 10 to 12 feet tall. **50c each; 3 for \$1.25.**

Double Flowering

VIRGINAL

MOCK ORANGE

Bloom throughout the season. Without question one of the most beautiful of the shrubs — single flowers on 1 year wood and double flowers on 2-year wood. Grows 6 to 8 feet in height, and is a valuable addition to any shrub group. It blooms with single flowers on new growth all summer.

2-yr., blooming size plants: 60c each; 3 for \$1.50.

VIRGINAL MOCK ORANGE

GREEN-LEAVED BARBERRY

No shrub is so generally planted or has so many practical uses as Japanese Barberry. It hasn't a single serious fault, and can be grown in shade, moist, dry or sunny locations. When grown as specimen plants or as an edging to taller shrubs its graceful arching branches covered with luxuriant green foliage in summer and flashing red berries all winter make a most pleasing sight. **50c each; 3 for \$1.25.**

RED-LEAVED BARBERRY

This brilliant Barberry is becoming more popular every year. Bronze-red leaves during the summer turn to fiery red in fall. Red Barberry should be planted in full sun for best color results: **60c each; 3 for \$1.50.**

BUSH HONEYSUCKLE

For a tall hedge or to screen an unsightly view there is no shrub so valuable. Will grow to the height of 10 to 12 feet in a few years. A beautiful shrub both summer and winter. Is the first to clothe itself with leaves in the spring, and its fragrant flowers and luxuriant foliage are a constant delight. Bright red berries cling to the bush all through the winter, giving a brilliant touch of color to the winter landscape. **50c each; 3 for \$1.25.**

RED CORALBERRY

This is the greatest shrub for shady places that we have ever seen. Grows to a height of 5 feet with gracefully arching branches and lacy foliage. Blooms are followed in fall by glowing red berries, twice the size of the old Indian Currant and as red as those of the High Bush Cranberry. Don't fail to get some of these shrubs for shady locations. **2-yr. shrubs: 50c each; 3 for \$1.25.**

KRIDER'S RED FLOWERING HONEYSUCKLE

This remarkable shrub will thrill you with its wonderful deep green foliage; its quick sturdy growth, its hardiness and free blooming habit. All the fine qualities of the Bush Honeysuckle plus a distinctly new color of blooms. It thrives in most any location or in most any type soil. When it is in full bloom it is literally studded with glowing rosy red flowers of most exquisite fragrance. Mature height 8 feet. **Heavy, 2-yr. blooming size, 75c each; 3 for \$2.00.**

VIBURNUM AMERICANUM

One of the best of all Viburnums for the shrub border or anywhere that a fairly tall shrub is needed. Beautiful bright green foliage; clustered white blooms in May; clumps of extremely large ornamental bright red berries following and remaining until early winter. Berries are about twice the size of those on the regular High Bush Cranberry. Will reach 8 to 10 feet high when matured. **2-yr., 60c each; 3 for \$1.50.**

HANSEN'S BUSH CHERRY

An ornamental shrub producing delicious fruit; easy to grow; perfectly hardy anywhere. The result of over thirty years' research and selection work by Prof. N. E. Hansen of South Dakota State College. A shrub which is very effective in any landscape planting and which bears delicious fruit of good size and excellent flavor. Starts to bear the year after planting and continues year after year. Makes superb jam, or clear, sparkling jelly. Don't neglect getting a few of them to add to your plantings. They always retain their dwarf stature. Heavy, 2-year size. **Price: 60c each; 3 for \$1.10.**

NOTE: This shrub cannot be sent into the States of California, Washington, Oregon, Colorado, Utah, Montana, Nevada, Arizona,

HYDRANGEA P. G.

Flowers in August with huge panicles measuring from 8 to 12 inches long. Blossoms are first a delicate shade of pink gradually changing to bronze in early autumn. **2-yr. blooming size: 50c each; 3 for \$1.25.**
